## PADFOOT DRUM VIBRATORY SOIL COMPACTOR

### FEATURES:

The Cat<sup>®</sup> CP54B features a padfoot drum and is ideally suited for cohesive and semi-cohesive soil applications:

- **Comfortable and ergonomic operator station** features pivoting seat with integrated multifunction LCD display and control console, outstanding visibility to the front and rear of machine, low sound levels and vibration for greater operator comfort and productivity.
- **World-class propel system** built around the exclusive Cat dual pump propel system, two pumps provide separate dedicated flow to drum drive motor and rear axle motor for exceptional gradeability and traction in forward and reverse. New electronic propel control enables more precise machine control.

- **Virtually maintenance free** due to maintenance-free hitch bearings and extended maintenance intervals for vibratory system and hydraulic system, providing more uptime and lower maintenance costs.
- **Cat<sup>®</sup> Compaction Control - Machine Drive Power (MDP) Option** helps the operator determine when compaction has been completed to spec for greater productivity and uniform compaction quality.
- **Enhanced compaction performance** due to more weight at the drum and greater amplitude. Automated propel and vibratory system functions make it easy to ensure consistent, high quality.
- **Involuted Oval Padfoot Design** provides deeper compaction than square faced pad designs. Square pad design also available.
